

XT TRAY

2023 CATALOGUE

AUSTRALIAN MADE PRODUCTS

DMW Trays

It can be hard to find a good quality ute tray that is built to last. Not only are our ute trays made of the highest quality materials, they are also designed, manufactured and tested right here in Australia. That means you can trust that our products will stand up to the toughest conditions. We have three different tray designs and options to choose from, so you can find the perfect ute tray for your application. Whether that's touring Australia, a quick weekend getaway or suitable for the worksite. We have a tray to suit all applications. This catalogue will outline the 'XT' tray. The XT Tray has been designed and manufactured to suit the DMW 200 Series dual cab conversions.

CLASSIC DESIGN

The XT tray has been designed to be an extremely functional and robust tray to suit the DMW 200 Series Landcruiser dual cab conversions. We have carefully adopted the XT tray design to suit the lines of the Landcruiser 200 Series to ensure the tray is not just practical, but looks good from any angle!

LIGHTWEIGHT

The XT tray is made from aluminium making it lightweight, durable and strong which allows you to make the most of your Landcruiser 200 Series payload and reduces the chance of being over your Gross Vehicle Mass (GVM).

TAPERED TOOL BOXES

Equipped with tapered tool boxes for additional storage for items like, recovery kits, tools, compressors and tyre deflators.

SEALED & LOCKABLE TRUNDLE DRAWER

The XT tray comes with a sealed and lockable trundle drawer. The drawer is a great place to put tools, camp equipment and recovery gear. Being lockable, it is also suitable for firearms. The drawer can also double as a work or camp table if needed!

60L HEADBOARD DIESEL TANK

The 60L long range diesel tank is a great option to add for those adventurers that require a larger fuel range between fuel stops. The tank is mounted in the headboard to maximise space.

70L WATER TANK

The XT tray can be fitted with an optional 70L water tank. The tank is powered by a pump and plumbed into a tap located under the tray.
