

# XTR TRAY

2023 CATALOGUE

AUSTRALIAN MADE PRODUCTS

## DMW Trays

It can be hard to find a good quality ute tray that is built to last. Not only are our ute trays made of the highest quality materials, they are also designed, manufactured and tested right here in Australia. That means you can trust that our products will stand up to the toughest conditions. We have three different tray designs and options to choose from, so you can find the perfect ute tray for your application. Whether that's touring Australia, a quick weekend getaway or suitable for the worksite. We have a tray to suit all applications. This catalogue will outline the 'XTR' tray package. The XTR tray package has been designed and engineered to suit a range of vehicles including the Landcruiser 79, 200, and 300 Series, Hilux, Y62 Patrol, Ford Ranger, Jeep Gladiator, and a lot more!

# MUSCULAR GOOD LOOKS

The XTR tray is designed to not just be extremely functional and practical, but it has been designed to look great on any vehicle. Each vehicle is different, so we have carefully adopted the XTR design to suit the lines of the vehicles to ensure the tray is not just practical, but looks good from any angle!

# LIGHTWEIGHT

The XTR tray is made from aluminium making it lightweight, durable and strong. This allows you to make the most of your vehicles payload and reduces the chance of your vehicle being over its Gross Vehicle Mass (GVM).

# TAPERED TOOL BOXES FOR ADDITIONAL STORAGE

Equipped with tapered tool boxes for additional storage for items such as, recovery kits, tools, compressors and tyre deflators.

## SEALED UNDER TRAY DRAWER

The XTR tray comes equipment with a fully sealed and lockable under tray drawer. The drawer is a great place to put tools, camp equipment and recovery gear. Being lockable, it is also suitable for firearms. The drawer can also double as a work or camp table if needed!

## WATER TANK

The XTR tray comes equipped with a 40L or 70L water tank (dependant on tray size), that is powered by a water pump and plumbed into a tap located under the tray.
